

ACS Funding Agreement with Partnering Dutch Universities

ACS Publications and Partnering Dutch Universities have agreed to partner for the next five years (2017–2021) on a pilot to explore sustainable models of open access.

What you need to know:

As of January 1, 2017, all articles whose corresponding author is affiliated with partnering Dutch Universities will be published open access in any ACS journal under an *ACS AuthorChoice* via CC-BY-NC-ND 4.0 license.

How it Works:

1. Submit using the corresponding author's affiliated university email extension address. By providing this, your article will automatically be made open access at the time of publication. See list of eligible email extensions.
2. Your work will then be published at no additional cost to you under an open access *ACS AuthorChoice* via CC-BY-NC-ND 4.0 license and made freely available on the ACS Publications website. In addition, your final published article will automatically be deposited to US Pub Med Central.
